

DETAILED CONTENTS

FOREWORDxv

PREFACExvii

I CONCEPTS, PRINCIPLES, AND APPLICATIONS

1	An Introduction to Managerial Epidemiology	3
	Case Study 1.1. Group Health East	7
2	Infectious Disease Epidemiology.....	17
	Agent, Host, and Environment.....	18
	Transmission.....	22
	Prevention	25
	Case Study 2.1. Food Poisoning Outbreak at 29 Bluegrass Hospital	29
	Epidemic Investigation.....	30
	Case Study 2.2. Outbreak of Influenza in a New York Nursing Home.....	36
3	Measuring and Interpreting Morbidity	43
	The Nature and Definition of Disease.....	43
	Natural History of Disease	44
	Sources of Morbidity Data	46
	Measuring Morbidity.....	47
	Case Study 3.1. Product Lines for Group Health East	51
	Screening.....	53
	Case Study 3.2. Breast Cancer Screening.....	56
	Case Study 3.3. Prostate Cancer Screening.....	59
4	Healthcare Planning and Needs Assessment	67
	Community Health Planning Tools and Benchmarks	70
	Case Study 4.1. Eastern Kentucky Health.....	73
	Institutional Planning.....	75
	Case Study 4.2. Determining Bed Demand for Cardiac Patients Age 65–84	76
	Strategic Planning Model	81
	Marketing	82
	Needs Assessment.....	84

	Case Study 4.3. Needs Assessment for Stroke	
	Services in Ontario, Canada	86
	Human Resources Planning	91
5	Quality of Care Measurement	97
	Epidemiology and Quality.....	99
	Rates and Surveillance.....	101
	Case Study 5.1. MRSA Surveillance at University Hospital	103
	Outcomes of Care—Complication Rates.....	105
	Case Study 5.2. Risk-Adjusted Complication Rates	
	in a Small Rural Hospital.....	108
	Managed Care	109
	Quality Indicators.....	112
	Case Study 5.3. Inpatient Quality of Care	
	Indicators for Bluegrass Hospital	114
	Total Quality Management.....	116
6	Mortality and Risk Adjustment	125
	Measuring Mortality with Rates	127
	Comparing Mortality Across Time, Place, and Person.....	129
	Case Study 6.1. Breast Cancer Mortality Rates	
	and Migration.....	135
	Standardization of Mortality Rates.....	138
	Case Study 6.2. Age and Gender Adjustment in	
	Two Managed Care Organizations.....	140
	Risk-Adjusted Mortality Rates.....	142
	Case Study 6.3. Risk Adjustment with	
	Contingency Tables—State of Pennsylvania	147
	Case Study 6.4. Risk Adjustment with Multivariate	
	Techniques—State of New York	149
7	Descriptive Epidemiology: Time, Place, Person.....	153
	Descriptive Epidemiology: The Person	153
	Case Study 7.1. Infant Mortality Disparities by Race.....	157
	Descriptive Epidemiology: Time	160
	Descriptive Epidemiology: Place	162
	Spot Maps.....	162
	Clusters.....	162
	Geographic Information Systems	164
	Case Study 7.2. HIV Clinics in Kentucky	170
II	EPIDEMIOLOGY AND FINANCE	
8	Epidemiology and Financial Management.....	177
	Healthcare Delivery: Reactive or Proactive?.....	177

Healthcare Risks	179
The Role of Epidemiology in Finance	181
Capitation: An Introduction	183
Capitation Basics	186
Risk Adjustment: The Basics	188
Case Study 8.1. Incorporating Health Risks into Capitation Rates	192
Adjusting Capitation Rates	195
Case Study 8.2. Group Health East: Risk Factors and Capitation Rates	197
Pay for Performance	200
Breakeven Analysis.....	201
9 Cost-Effectiveness Analysis.....	205
Cost-Effectiveness Ratios	206
Cost-Effectiveness Model	207
Program Specification.....	207
Measuring Effectiveness	208
Quality-Adjusted Life Years.....	210
Case Study 9.1. The Oregon Medicaid Prioritization of Health Services Program	212
Biased Estimates	213
Measuring Costs	214
Cost-Benefit Analysis.....	218
Choosing Among Programs	219
Case Study 9.2. Cost-Effectiveness Analysis of Treatment Options for Acute Otitis Media (Earache)	221
Uncertainty	223
Case Study 9.3. Cost-Effectiveness of Health Insurance.....	223
Case Study 9.4. CEA for Targeted or Universal Prostate Cancer Testing.....	226

III EVIDENCE-BASED MANAGEMENT AND MEDICINE

10 Statistical Tools.....	237
Descriptive and Inferential Epidemiology	237
Levels of Measurement.....	238
Sampling.....	238
Descriptive Statistics for Continuous Variables	239
Descriptive Statistics for Categorical Variables	242
Inferential Statistics	244
Z Test for Differences in Proportions	249
Confidence Intervals	250

11	Case Control Studies	267
	Selection of Cases and Controls	267
	Exposure.....	269
	Relative Risk in a Case Control Study	271
	Confounding	273
	Attributable Fraction	275
	Sources of Bias	277
	Case Study 11.1. Coffee and Pancreatic Cancer	277
	Case Study 11.2. Smoking and Low Birth Weight Newborns.....	283
	Case Study 11.3. Fen-Phen and Primary Pulmonary Hypertension.....	287
	Cross-Sectional Studies	288
	Case Control Advantages and Disadvantages	290
12	Cohort Studies	295
	Selection of Cohorts.....	299
	Exposure.....	300
	Relative Risk in a Cohort Study	304
	Case Study 12.1. Scottish Heart Study	305
	Attributable Fraction	306
	Case Study 12.2. The “Unknown Cohort Study”	307
	Measuring Incidence	309
	Case Study 12.3. Smoking, Heart Disease, and Lung Cancer	310
	Case Control and Cohort Studies	313
	Case Study 12.4. Smoking and Prostate Cancer	315
	Survey Methodology	316
	Advantages and Disadvantages	317
13	Randomized Clinical Trials	321
	Randomization	323
	Historical Controls and Crossover Studies.....	325
	Methods of Randomized Clinical Trials	326
	Sample Size.....	327
	Duration and Masking.....	329
	Integrity of the Randomization.....	331
	Ethical Considerations.....	333
	Case Study 13.1. The RAND Health Insurance Experiment.....	335
	Factorial Design	336
	Case Study 13.2. Vitamin E and n-3 Polyunsaturated Fatty Acids After Myocardial Infarction	337
	Randomized Clinical Trials and Hospital Firms	340

	Case Study 13.3. Inpatient Staffing at Henry Ford Hospital	342
	Meta-Analysis	344
	Community Trials.....	346
14	Clinical Epidemiology and Decision Making	353
	Experience and Tradition in Medical Practice	354
	The Evidence Base of Clinical Practice.....	355
	The Clinical Encounter	360
	Case Study 14.1. Making a Diagnosis for a Patient Presenting with Chest Pain	361
	Case Study 14.2. Treatment Options for a Patient Diagnosed with GERD	364
	Prevention	365
	Case Study 14.3. Prevention and Control Strategies	367
	Cost-Effectiveness and the Number Needed to Treat.....	369
	Case Study 14.4. Family History and Number Needed to Treat	370
	The Future	371
	Case Study 14.5. Clinical Decision-Making Toolbox.....	374

IV APPLICATIONS OF EPIDEMIOLOGY TO SPECIFIC DISEASES

15	Cardiovascular Disease	387
	The Epidemiology of CVD	388
	Trends in CVD Mortality	389
	The Geographic Distribution of CVD.....	393
	The Biology of CVD and Risk Factors	396
	Managerial and Economic Considerations with Screening.....	398
	Case Study 15.1. Screening for CAC	401
	Other Considerations for Screening Tests	404
	Cost-Effectiveness of CAC	405
	Case Study 15.2. Cost-Effectiveness of Gastric Bypass for Severe Obesity.....	406
	Strategies for the Prevention of CVD	409
16	Human Immunodeficiency Virus Infection	417
	Burden of Disease.....	418
	Diagnoses	419
	Prevalence.....	422
	Mortality	423
	Screening and Diagnostic Tests	425
	Case Study 16.1. HIV-1 Enzyme Immunoassay for HIV	427
	Prevention and Control Measures	429

	Measures of Quality of Care.....	430
	Study Designs Used to Examine Risk Factors.....	431
	Case Study 16.2. Cost-Effectiveness of HIV Screening.....	432
17	Alzheimer's Disease.....	441
	Introduction to Alzheimer's Disease.....	442
	The Magnitude of the Problem: Prevalence, Incidence, and Mortality Rates and Their Implications.....	446
	Case Study 17.1. Alzheimer's Disease Incidence, Prevalence, and Mortality.....	449
	Diagnosis and Detection.....	452
	Case Study 17.2. Screening for Cognitive Impairment: The Mini-Mental State Examination.....	455
	Management and Care.....	457
	Challenges to the Epidemiologic Study of Alzheimer's Disease.....	460
	Case Study 17.3. Study Designs and Measures of Association (Example: Smoking and Alzheimer's Disease).....	462
	INDEX.....	473
	ABOUT THE AUTHOR.....	487
	ABOUT THE CONTRIBUTORS.....	489
