

DETAILED CONTENTS

Preface xvii

Part I Introduction to Healthcare Operations 1

1 The Challenge and the Opportunity 2

 Introduction 4

 Purpose of this Book 4

 The Challenge 5

 The Opportunity 8

 A Systems Look at Healthcare 9

 An Integrating Framework for Operations Management
 in Healthcare 12

 Conclusion 15

 Discussion Questions 15

 References 16

2 History of Performance Improvement 18

 Operations Management in Action 20

 Overview 20

 Background 21

 Knowledge-Based Management 22

 History of Scientific Management 24

 Quality 29

 Service Typologies 41

 Supply Chain Management 43

 Conclusion 44

 Discussion Questions 46

 References 46

3 Evidence-Based Medicine and Pay-for-Performance 50

 Operations Management in Action 52

 Overview 53

 Evidence-Based Medicine 54

 Tools to Expand the Use of EBM 58

 Vincent Valley Hospital and Health System and P4P 64

Using EBM and Public Reporting to Advance Health Policy: A Proposal	65
Conclusion	66
Discussion Questions	67
References	67
Part II Setting Goals and Executing Strategy	69
4 Strategy and the Balanced Scorecard	70
Operations Management in Action	72
Overview	72
Moving Strategy to Execution	73
The Balanced Scorecard in Healthcare	77
Linking Balanced Scorecard Measures to Strategy	87
Implementation of the Balanced Scorecard	91
Conclusion	95
Discussion Questions	95
Chapter Exercise	96
Case Study: Saint Mary's Duluth Clinic	96
References	98
Further Reading	99
5 Project Management	100
Operations Management in Action	102
Overview	102
Definition of a Project	103
Project Selection and Chartering	104
Project Scope and Work Breakdown	111
Scheduling	115
Project Control	120
Communications	124
Risk Management	124
Quality Management, Procurement, the Project Management Office, and Project Closure	126
The Project Manager and Project Team	129
Conclusion	134
Discussion Questions	134
Chapter Exercises	134
References	134
Part III Performance Improvement Tools, Techniques, and Programs	137
6 Tools for Problem Solving and Decision Making	138
Operations Management in Action	140
Overview	140
Decision-Making Framework	141

Mapping Techniques	144
Problem Identification Tools	149
Analytical Tools	157
Implementation: Force Field Analysis	165
Conclusion	167
Discussion Questions	167
Chapter Exercises	168
References	168
7 Using Data and Statistical Tools for	
Operations Improvement	170
Operations Management in Action	172
Overview	174
Data Collection	175
Graphic Tools	178
Mathematic Descriptions	183
Probability and Probability Distributions	186
Confidence Intervals and Hypothesis Testing	201
Simple Linear Regression	210
Multiple Regression	218
Additional Techniques	219
Conclusion	220
Discussion Questions	222
Chapter Exercises	222
References	224
8 Quality Management: Focus on Six Sigma	226
Operations Management in Action	228
Overview	229
Defining Quality	229
Cost of Quality	230
Quality Programs	231
Six Sigma	234
Additional Quality Tools	245
Riverview Clinic Six Sigma Generic Drug Project	250
Conclusion	253
Discussion Questions	255
Chapter Exercises	255
References	257
9 The Lean Enterprise	260
Operations Management in Action	262
Overview	263
What is Lean?	263
Types of Waste	264
Kaizen	265
Value Stream Mapping	266
Measures and Tools	267
Conclusion	279

	Discussion Questions	279
	Chapter Exercises	280
	References	280
10	Simulation	282
	Operations Management in Action	284
	Overview	285
	Uses of Simulation	286
	The Simulation Process	287
	Monte Carlo Simulation	288
	Discrete Event Simulation	295
	Conclusion	308
	Discussion Questions	308
	Chapter Exercises	309
	References	310
Part IV	Applications to Contemporary Healthcare Operations Issues	311
11	Process Improvement and Patient Flow	312
	Operations Management in Action	314
	Overview	315
	Problem Types	316
	Process Improvement Approaches	318
	Process Improvement in Practice	325
	Conclusion	339
	Discussion Questions	340
	Chapter Exercises	340
	References	340
	Recommended Reading	341
12	Scheduling and Capacity Management	342
	Operations Management in Action	344
	Overview	344
	Staff Scheduling	346
	Job/Operation Scheduling and Sequencing Rules	350
	Patient Appointment Scheduling Models	352
	Advanced Access Patient Scheduling	356
	Conclusion	366
	Discussion Questions	366
	Chapter Exercises	367
	References	369
13	Supply Chain Management	370
	Operations Management in Action	372
	Overview	374
	Supply Chain Management	375
	Tracking and Managing Inventory	375

Demand Forecasting	378
Order Amount and Timing	383
Inventory Systems	391
Procurement and Vendor Relationship Management	392
Strategic View	393
Conclusion	394
Discussion Questions	394
Chapter Exercises	395
References	396
Part V Putting It All Together for Operational Excellence	399
14 Holding the Gains	400
Overview	402
Human Resource Planning	403
Managerial Accounting	404
Control	406
Which Tools to Use: A General Algorithm	408
Operational Excellence	415
VVA Strives for Operational Excellence	416
The Healthcare Organization of the Future	418
Conclusion	419
Discussion Questions	419
Case Study: VVA	419
References	420
Index	421
About the Authors	431
