ACHE HEALTHCARE EXECUTIVE
2022 COMPETENCIES
ASSESSMENT TOOL

The American College of Healthcare Executives' *Healthcare Executive Competencies Assessment Tool* is offered as an instrument for healthcare leaders to use in assessing their expertise in critical areas of healthcare management.

How to Use This Tool

This tool can be used in several different ways to identify areas of strength and areas that may need professional skill development as well as formulating a development plan. Some examples of how this tool can be used are listed below.

- *Self or organizational assessment.* The tool is designed to help you identify strengths and areas for development in relation to ACHE's competencies. It may provide valuable information in your performance planning and review.
- *Team or group development.* The tool may help link individual performance to the goals of the organization. Integrating knowledge and skills needed for effective leadership will allow team members to achieve corporate goals, objectives and values.
- *Employee selection or job descriptions.* The tool may provide the ability to look beyond the individual and understand the composition of the entire workforce by exploring the strengths, weaknesses and gaps across the organization. You can make more informed decisions regarding training initiatives, allocate resources more effectively and align development opportunities with organizational goals.
- *Academic or professional development programs.* The tool may help uncover knowledge and skills you may wish to update or improve. Once you have completed the ratings, you will get results that point to the competencies you should focus on when choosing professional development opportunities.

This tool is self-scored with no right or wrong answers. Use the results to make a development plan, and complete the *ACHE Competencies Assessment Tool* at desired intervals to measure growth over time.

To assess expertise in the five domains of this tool, consider where you, the person, or the team you are assessing would fall on the scale of skill acquisition.

- *Novice (1)*—An individual's primary focus is understanding and gaining information in order to comprehend the skills needed. You have the level of experience gained in a classroom setting or on-the-job training. You are expected to need help when performing this skill.
- *Competent (3)*—People with considerable experience develop competence in solving problems within the learned guidelines and rules. You are able to successfully complete the competency as requested. Help from experts may be required from time to time, but you can usually perform the skill independently.
- *Expert (5)*—Experts work intuitively analyzing, recognizing patterns, critiquing and solving problems with ideas and expertise. You are known as the expert in this area. You can provide guidance, troubleshoot and answer questions related to this competency.

For your convenience, a complete list of ACHE resources, including readings, programs, assessments, and self-study courses are included in the back of the directory and referenced by number in each section of the assessment.

About This Tool

The competencies are derived from job analysis surveys of healthcare leaders across various management and administration disciplines. They are aligned with the challenges and opportunities experienced by leaders today. The tool is reviewed and updated annually.

*derived from HLA Model

Within the *ACHE Healthcare Executive Competencies Assessment Tool*, the competencies are categorized into five critical domains: Communication and Relationship Management, Leadership, Professionalism, Knowledge of the Healthcare Environment and Business Skills and Knowledge. The definitions for the domains are as follows:

1. Communication and Relationship Management

The ability to communicate clearly and concisely with internal and external customers, establish and maintain relationships and facilitate constructive interactions with individuals and groups. This domain includes:

- A. Relationship Management
- B. Communication Skills
- C. Facilitation and Negotiation

2. Leadership

The ability to inspire individual and organizational excellence, create a shared vision and successfully manage change to attain the organization's strategic ends and successful performance. Leadership intersects with each of the other four domains. This domain includes:

- A. Leadership Skills and Behavior
- B. Organizational Climate and Culture
- C. Communicating Vision
- D. Managing Change

3. Professionalism

The ability to align personal and organizational conduct with ethical and professional standards that include a responsibility to the patient and community, a service orientation, and a commitment to lifelong learning and improvement. This domain includes:

- A. Personal and Professional Accountability
- B. Professional Development and Lifelong Learning
- C. Contributions to the Community and Profession

4. Knowledge of the Healthcare Environment

The understanding of the healthcare system and the environment in which healthcare managers and providers function. This domain includes:

- A. Healthcare Systems and Organizations
- B. Healthcare Personnel
- C. The Patient's Perspective
- D. The Community and the Environment

5. Business Skills and Knowledge

The ability to apply business principles, including systems thinking, to the healthcare environment. This domain includes:

- A. General Management
- B. Financial Management
- C. Human Resource Management
- D. Organizational Dynamics and Governance
- E. Strategic Planning and Marketing
- F. Information Management
- G. Risk Management
- H. Quality Improvement
- I. Patient Safety

Healthcare leaders should demonstrate competence in aspects of all five of these domain areas. As you work your way through the *ACHE Competencies Assessment Tool*, we hope you will find it valuable and that it provides guidance along your path of lifelong professional education as you face the ongoing challenges of management and leadership. We have made it available as a PDF file at [ache.org/CareerResources](https://www.ache.org/CareerResources) and hope you will share it with other healthcare leaders.

About the Competencies

The competencies were derived from job analysis surveys conducted by Healthcare Leadership Alliance associations. In addition to the American College of Healthcare Executives, members of the Healthcare Leadership Alliance are American Association of Physician Leadership, American Organization of Nurse Executives, Healthcare Financial Management Association, Healthcare Information and Management Systems Society and Medical Group Management Association.
